

# International Solutions end user benefits

EMS, a distributor of IP based intercoms and speakers, cards, readers, biometrics and parking guidance solutions. We assist clients by listening to and understanding their business so that by implementing any of our solutions enhance value and creates greater stability and wealth.

We have **dealers** who believe in our products  
Ask us for contact information

Three product portfolios from which we design solutions

Identity Management and Control  
Parking Identification, Navigation & Control  
Communication & Security

Each product provides a solution, together an integrated system, on their own or when added into your current system old or VERY old. It is in this way we can tailor solutions to client expectations or move control or conversations to a more centralised location

**With one of our trusted identity solutions, STid**, we Lock Down Peace of Mind with No Plastic.

Get effortless mobile identity verification experiences with Badge | Slide | Tap Tap | Remote | Hands-free | Voice, always ensuring their identities are seamlessly accepted, anywhere, anytime. The phone **IS** the biometric.

**For parking** solutions that provide effortless parking management solutions, from low cost BLE mesh connected units for upgrade of existing installations requiring only DC power to commission, to fully NPR solution with world class bay management. Improve your clients experience and efficiency or adapt to already owned systems of lighting, access control barriers, payment systems and other.

**On communication**, we bring the benefits of professional audio and intercom communication to a host of different environments. Intercoms and refuge poles offer reassuring beacons of help and support. Communication, Help and Advertising offer self finance options. Whatever your needs, wherever you need to talk to or from, with ems, we offer seamless communication automatically or manually with one touch of a button from anywhere in the world.
