

International Solutions mining

EMS, a distributor of IP based intercoms and speakers, cards, readers, biometrics and parking guidance solutions. We assist clients by listening to and understanding their business so that by implementing any of our solutions enhance value and creates greater stability and wealth.

Three product portfolios from which we design solutions

Identity Management and Control

Identification, 3D Control, Analytics, Tracking, & Guidance
Communication & Security

With one of our trusted identity solutions, STid reduces guard costs when combining Mobile & vehicle tag verification for industrial, commercial or express/visitor lane access

Combination MiFare | QR | Prox | Barcode readers

Unique site key | UHF tagging for vehicle into all areas

UHF Idemia Wave one to one verification tagging of underground workers through miners lamp applied UHF tag

UHF Lamp Room tagging of helmets & Tyre tracking

Get effortless 5 mobile identity experiences and when used with Remote or Voice the mobile device **IS** the biometric.

With one of our analytic solutions, Flasheye brings, industrial & security 3D data processing in real-time and provides insights about our physical world. Detect events and react with precise data. 3D monitoring will drive automation and enhance safety across industries using cutting edge lidar devices from **Ouster** & **Hesai**.

Detect events and react with precise data, **Volumes, Haul & Conveyor** use 3D image analysis to provide operational data in real-time, automatically acted upon with automation of processes, feedback, control and loss prevention.

On professional audio, evacuation & PA communication, we bring, Analogue or Digital circuits | together with SIP, IP, Tetra | & GSM solutions, IP67 & Explosions proof intercoms for all locations

All units provide evacuation and process communication between equipment locations, lifts and winding rooms, drag line, mine face, conveyor systems with control room offsite communication for weighbridges or lidar event response, camera locations, remote gates, any across site communication using IP

Your solution partner
Specific Supply Products

unified
PA

Specific Supply Map

Access Control

- Saflec - IP & Multidoor Access Solution
- STid - UHF Vehicle Tagging and Mobile Credential Control

Biometric Control

STid / Idemia / Suprema / HikVision / HID / DormaKaba

Communication

Commend & KNTech - VoIP / SIP / Analogue / Digital / GSM

Door Furniture

DormaKaba & Assa Abloy - electronic & manual operating systems

Evacuation & PA

Commend IP - Announcement & Display

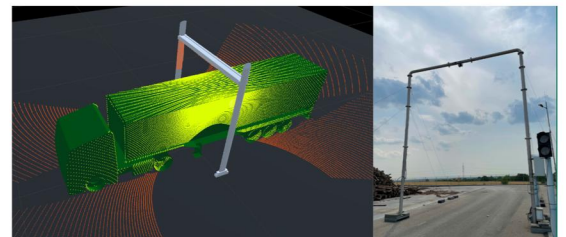

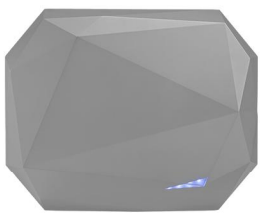

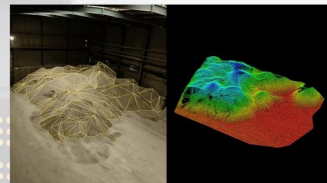

Lidar Analytics - Automated solutions - Volumes, Haul, Conveyor & Perimeter provide real-time data for security & process management in diverse industries such as mining, logistics, industrial

Identity - STid Mobile, MiFare Classic, MiFare PLUS, iCLASS® / Seos® / iCLASS SE® / iCLASS® / Crescendo® / FlexSmart® / MIFARE® / DESFire® / HITAG / Impro® & HID Proximity / Indala® / UltraCard® / LEGIC®

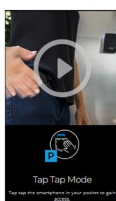

Readers - STid, Dormakaba, Assa Abloy, HID

Parking, Image LPR & Space Guidance

ParkSol Parking Guidance Solutions - Camera and Sensor with indicators, guidance screens and displays

STid & STid Mobile ID® integrates with ANY existing systems. All protocols are supported, including SSCP®, OSDPTM, TTL Data Clock, and Wiegand.
