

STid Global Upgrade on Old Access Systems

emsProductFocus03-STidGlobalUpgrade

Unify Your Security Across All Sites – One Simple System

Dealing with a mess of old access systems, mismatched cards, and different contractors at every location?

Imagine **one modern, secure setup** that works everywhere – easy to manage, tough to hack, and future-ready. EMS's **STid ARC-A readers + Mobile Credentials** make that happen!

The Old Problems (Multi-Site Chaos):

- **Fragmented setups:** Each site has its own outdated system – creates weak spots and admin headaches.
- **Legacy tech:** Old systems miss modern security features and are easy targets for attacks.
- **Card chaos:** Different standards (Prox, MiFare, etc.) at different sites – costly and confusing to manage.
- **Maintenance nightmare:** Multiple contractors, endless coordination, high bills, and delays.

The Smart EMS Solution: STid ARC-A readers with Mobile Virtual Credentials – unify everything into one secure, phone-based system.

How It Works (Straightforward & Powerful):

- **Fits anywhere:** Supports Wiegand, OSDP, and secure SSCP protocols – plugs right into your existing (or new) systems without rewiring.
- **One central control:** Manage all users, credentials, and access from a single web portal – issue, revoke, or update in seconds.
- **Single mobile card for everyone:** Staff, security teams, and visitors get one STid Mobile Virtual Card on their phone – no more juggling multiple cards.
- **Works across all sites:** Same credential opens doors/gates at every location – consistent, secure, and hassle-free.
- **Built to last:** Lifetime warranty + future-proof design – your investment stays strong as tech evolves.

Big Wins You'll See Right Away:

- **Stronger security:** Encrypted mobile credentials and modern protocols replace vulnerable old tech.
- **Way simpler management:** One portal for all sites – no more scattered logins or databases.
- **Real cost savings:** Cut contractor fees, eliminate multiple card types, and reduce maintenance.
- **Faster & smoother operations:** Consistent access everywhere – staff and visitors love it.
- **Ready for tomorrow:** Easily adapts to new needs without starting over.

Standout Highlights:

- Supports over 6,500 access/entry points.
- Latest encrypted protocols between reader and phone.
- Drops right into your current systems.
- Lifetime warranty – invest once, stay protected.

Stop the patchwork security nightmare. Start running a unified, modern system that actually makes your life easier.

Ready to revolutionize access across all your sites?

Contact EMS today to learn more about STid ARC-A readers and Mobile Virtual Cards – and discover how we can bring your entire security operation together securely, simply, and affordably.

One system. One credential. Total peace of mind. 🗝️📱🌐
